

POST-SHOW REPORT 2025

Organised By

A Dynamic Platform for Industry Advancement, Networking, and Growth

The 2nd edition of UTECH India – Sustainable Polyurethane & Foam Expo 2025 successfully reinforced its position as the premier meeting ground for the PU and foam industry. The event brought together a strong mix of manufacturers, formulators, technology suppliers, and solution innovators, with exhibitors presenting cutting-edge advancements across the full polyurethane and foam ecosystem. Attendance reflected a highly engaged audience from automotive, bedding & furniture, construction, insulation, packaging, footwear, and appliance sectors, demonstrating continued market confidence and industry momentum.

This year's edition delivered enhanced value through accelerated business networking, sourcing opportunities, and cross-sector collaboration. The technical program continued to be a core highlight, featuring expert-led sessions that offered actionable insights into sustainability, efficiency, material innovation, and evolving application demands. Exhibitors and visitors alike reported strong commercial engagement, brand visibility, and pipeline development, underscoring the expo's growing role as a strategic business catalyst.

The success of the 2025 edition further validates UTECH-India as a high-impact platform backed by Crain Communications and Media Fusion, strengthening industry participation and paving the way for continued growth. With expanding market interest and positive stakeholder feedback, the event continues to set new benchmarks for innovation exchange, relationship building, and industry elevation in India's rapidly evolving polyurethane and foam landscape.

RECOGNITION & **FELICITATION**

At the UTECH India 2025 Grand Finale, we celebrate the visionaries who are shaping the PU industry!

A heartfelt felicitation of our esteemed guests, exhibitors and speakers.

EXCLUSIVE PRODUCT LAUNCHES

The UTECH India platform continues to be where innovation meets opportunity, and Aryanvi's launch is a shining example of the future of PU technology in action.

ARYANVI PU SOLUTIONS

PAVAMAN POLY PRODUCTS

PAVAMAN POLY PRODUCTS PRIVATE LIMITED proudly unveiled the upgraded zackerbuffers, setting a new benchmark in performance and durability.

EXCLUSIVE BOOK LAUNCHED

BY SATHISH KUMAR K

By bringing thought leadership to the forefront, UTECH continues to be the platform where ideas evolve, solutions emerge, and the future of the PU & construction ecosystem is shaped. We had the honour of unveiling **SATHISH KUMAR K**'s groundbreaking book - *"Building the Future: Mastering Insulated Sandwich Panels for Sustainable Construction."*

EXULTANT EXHIBITORS & VISITORS

SHARE THEIR EXPERIENCE

“UTECH India is a crucial platform for the Indian market, bringing together a growing audience eager to learn about polyurethane innovations. It plays a key role in advancing the rigid polyurethane sector, driving awareness about new technologies like CFC- and SCFC-free chemicals, and supporting the transition to sustainable materials such as halogen-free PIR. This event helps elevate the entire industry by promoting knowledge exchange and showcasing cutting-edge developments essential for India’s construction and insulation growth.”

Sathish Kumar K,
*DGM for Metalscope
India Private Limited*

“Presentations under the UTECH banner, like mine on Castor Oil as a sustainable resource, are vital to raise awareness about bio-based raw materials in polyurethane applications. This platform helps address global challenges like climate change by promoting solutions beneficial for today and tomorrow.”

Subhash Udeshi
*Director,
Jayant Agro-Organics Ltd.*

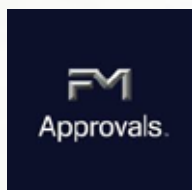

“A big thank you to UTECH India – for a young start-up like ours, this platform and its promotion have been invaluable, giving us exactly the kind of customer reach we need and truly supporting our growth.”

Devi Raamamoorthy,
Founder, Thaal Innovations

“UTECH India has been a great platform for us – the exhibition is much better organized than last year, we have met many new high-quality customers, and we see strong opportunities to grow our polyurethane and related business in the Indian market.”

Mohamed Mokhtar,
Technical Manager, Zurechem

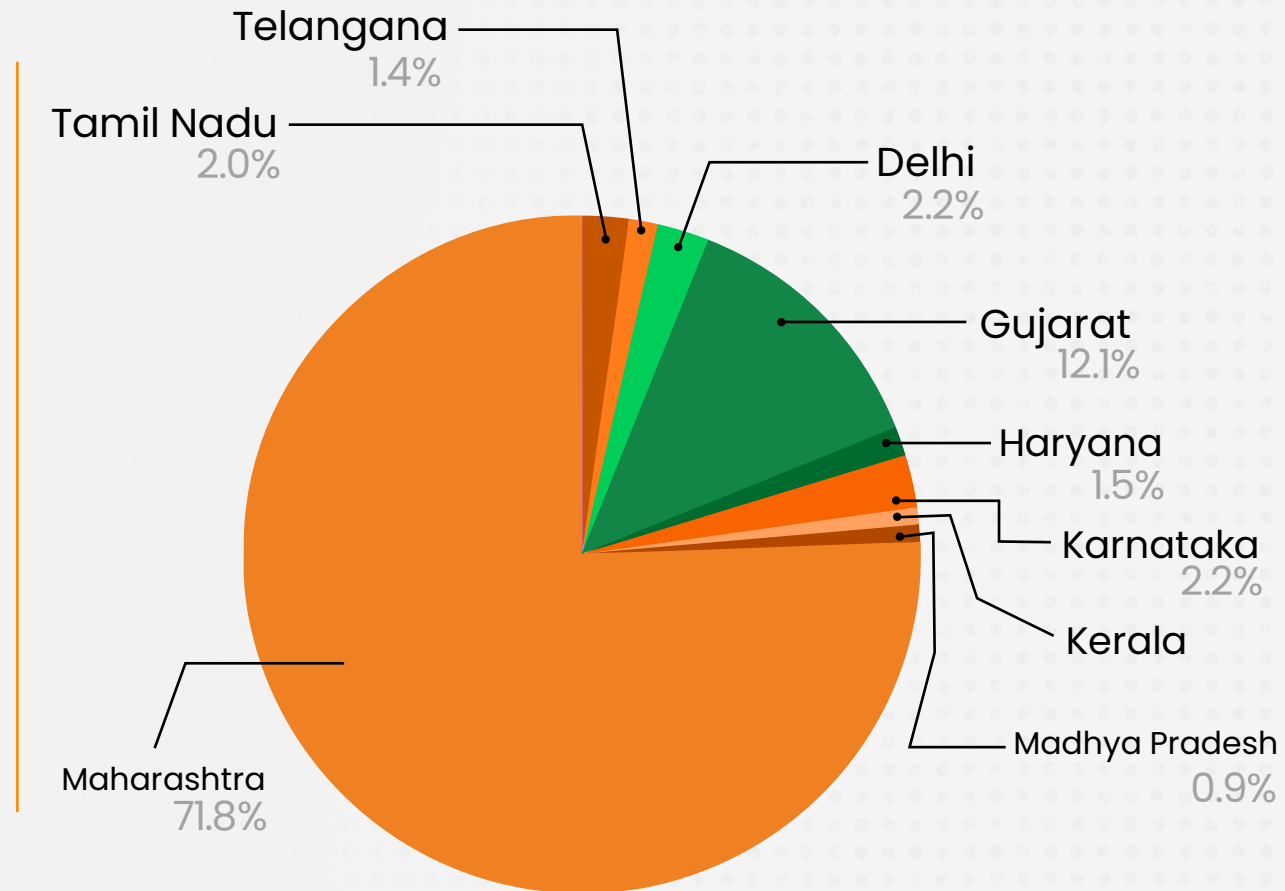

TOP VISITING COMPANIES AT UTECH -INDIA 2025

VISITOR PROFILE & DEMOGRAPHICS

Manufacturers of

- Foam
- Polyurethane
- Thermal Insulation
- Moulded Products
- Cutting Equipment
- Adhesives and Sealants
- Rigid & Flexible PU Foam Systems
- Casting & Moulding Technology
- PU Footwear Technology

EXHIBITOR PROFILE

Manufacturer, Traders, & Distributors of:

- Polyurethane Spray Foam
- Rigid & Flexible Polyurethane Foam Systems
- Specialists Foam Packaging
- Spray Foam Insulation
- Casting & Molding Technology
- PU Footwear Technology
- Automation & Control
- Types of Machinery & Equipment

BUZZ CREATED

Energetic, high-engagement campaigns across LinkedIn, Instagram and YouTube created powerful social media buzz for UTECH India, amplifying exhibitor stories and driving nationwide visibility for the show.

Machine Maker is Live at [UTECH India - Sustainable Polyurethane & Foam Expo & Plastics Recycling Show India](#) — Capturing the Pulse of Sustainable Innovation.

Machine Maker, the official media partner for both UTECH India and the Plastics Recycling Show India, is on the ground in Mumbai covering the biggest stories shaping the future of polymers, recycling, and sustainable materials. From breakthrough machinery and recycling technologies to global collaborations and expert insights, our team is documenting every moment that defines India's accelerating transition toward a circular economy.

Over the next three days at the Bombay Exhibition Centre, we are bringing real-time updates, interviews with industry leaders, and powerful narratives from exhibitors, innovators, and solution providers participating at both shows organised by Media Fusion.

Through live videos, photo stories, and exclusive interactions, Machine Maker continues its commitment to spotlighting the people, processes, and technologies powering India's manufacturing and sustainability journey. 🌱

Sometimes, the most inspiring moments happen when passion, innovation, and people come together under one roof—and UTECH 2025 was exactly that for us.

Walking into the exhibition hall as an exhibitor, and later stepping onto the stage as a speaker, we felt like a milestone in Aryanvi's journey. Every conversation, every handshake, and every curious visitor at our booth reminded us why we do what we do: to push the boundaries of polyurethane technology and contribute something meaningful to this industry.

This year was especially special. After months of engineering, testing, refining (and yes—plenty of sleepless nights), we unveiled our latest innovations:

- Our new 4-Component Mixing Head
- Our machinery for Dual Density Foam Production

Seeing the excitement and curiosity from attendees as we demonstrated these technologies was incredibly rewarding. It felt like a shared celebration—not just of a product launch, but of teamwork, persistence, and progress.

As we look back at UTECH 2025, we carry with us not just the success of the event, but the connections, insights, and renewed energy to keep moving forward.

Sharing a few moments from the journey 📸

Here's to more innovation, more learning, and many more milestones ahead.

late post!

I recently had the honor of representing Covestro at [UTECH India - Sustainable Polyurethane & Foam Expo 2025](#), where I spoke on 'Innovative Polyurethane Solutions'. It was a pleasure engaging with business leaders and presenting on how we're addressing new-age challenges in Rigid Polyurethanes, with a focus on Sustainability, Circular Economy initiatives, and Flammability performance.

I enjoyed interacting with stakeholders and exploring solutions that will propel the industry forward. Grateful for the opportunity to contribute to the conversation!

I'm heading to [UTECH India - Sustainable Polyurethane & Foam Expo](#) this week!

In my role as Global Offering Manager at [Solstice Advanced Materials](#), I'm always inspired to see how different regions drive innovation—and India's PU industry is fast becoming a global force, combining scale, innovation, and a strong push toward sustainability.

Excited to connect, exchange insights, and explore how we can accelerate the future of high-performance materials together.
